SUMMARY

Flutter Developer building production-ready mobile and web applications. Skilled in Flutter, Dart, REST API integration, Firebase, and state management (GetX, Provider, Bloc). Delivered multiple apps published on Google Play Store, optimized for performance, real-time features, and scalable architecture. Strong collaborative skills with experience in fast-paced development teams.

TECHNICAL SKILLS

Languages: Dart, Java
Frameworks: Flutter
State Management: GetX, Provider, Bloc
Architecture: Object-Oriented Programming (OOP), MVC, MVVM, Clean Architecture
Backend & APIs: RESTful APIs, GraphQL, WebSockets, Laravel (CRUD API Development)
Firebase: Authentication, Firestore, Realtime Database, Cloud Storage
Integrations: Google Maps API, Stripe, AdMob, Push Notifications, Deep Linking
Database: MySQL (XAMPP), Firebase
Internationalization: Flutter Localization (l10n)
Deployment: Google Play Store, Apple App Store, Release Management
Version Control: Git, GitHub, GitFlow

PROFESSIONAL EXPERIENCE

Flutter Developer — Funtash Technologies | Mar 2025 – Present

• Developed and maintained production-ready Flutter applications with real-time features.

• Integrated REST APIs and WebSockets for live updates and optimized performance.

• Implemented scalable state management using GetX and Provider.

• Collaborated with backend teams for clean API architecture and improved UX.

Flutter Developer — Techanion Pvt Ltd | Dec 2023 – Mar 2025

• Contributed to live applications published on Play Store.

• Integrated REST APIs and improved application responsiveness.

• Assisted in debugging and performance optimization.

Flutter Developer Intern — Itsolera Pvt Ltd | Aug 2023 – Nov 2023

• Assisted in Flutter UI development and API integration.

• Worked with Firebase Authentication and Firestore.

KEY PROJECTS

GFCM Trading App: Real-time trading app built with Flutter & GetX, featuring live charts, order placement, portfolio tracking, WebSockets, REST APIs, and pagination for optimized performance.

Food Delivery System: Multi-role Flutter app for food ordering & delivery with real-time tracking. Includes **User App** (browse & order food, track deliveries), **Delivery App** (accept deliveries, update status), **Admin Panel** (manage items & orders).

Snooker Management System (Flutter Web): Web app for managing tournaments, players, and schedules with role-based access control. Includes **Admin Panel** (manage roles & approvals), **Manager & Operator** (handle allocations & sales).

https://hussainmatloob.github.io/snooker_management/

Ground Booking System: Multi-role sports ground booking app using Flutter, Firebase & REST APIs. Includes **Booking User** (browse & book grounds), **Booking Partner** (manage grounds & bookings), **Admin Panel** (add/manage grounds & assign partners).

https://play.google.com/store/apps/details?id=com.techanion.bookingpartner

https://play.google.com/store/apps/details?id=com.techanion.groundbooking

LoveConnection: Matrimonial application developed using RESTful APIs and GetX for state management. Users are matched based on preferences, can send friend requests.

https://play.google.com/store/apps/details?id=com.loveconnection.app

WedPlan360: Wedding expense, add tasks and guest management app with email invites and receive push notifications for task reminders based on start and end dates.

EDUCATION

Bachelor of Computer Science — FUUAST Islamabad (2019 – 2023)

CERTIFICATIONS

• **Web Engineering Advanced (Laravel**) — Hazza Institute of Technology
• **Cyber Security** — Hazza Institute of Technology
